*Welcome to our 9th Annual Bull Sale!*

It is with great pleasure that we welcome you to our 9th annual production sale. Thank you to all our past customers for your interest and support in our breeding program. And to all the people looking at us for the first time, we can't wait to meet you and talk cattle. For one of the greatest joys of being in this business is meeting with past customers or meeting new people and talking cattle over coffee or some other beverage of choice.

As always, this year's bulls are all AI sired or embryo transplant calves from some of the top AI sires in the industry. We select these sires for their ability to put pounds on your feeder calves and maternal qualities into your replacement heifers. The mothers of these young sires are selected for their docility, quality udders, sound feet and their ability to consistently wean off top-producing calves.

This year we have several registered Angus bulls available for those of you looking for that. Their EPD's will be available along with their actual weights. In the top right hand corner of each lot, it will tell you whether they are registered angus (Reg. AN), purebred Angus but not registerable (PB AN) or what percentage of Angus if they are SimAngus cross (3/4 or 7/8). Registered doesn't mean they are any better or worse than the crossbred bulls. It is up to every cattleman what their preference is based on looks and performance data available.

We look forward in great anticipation of seeing you this year at our 9th Annual Production Sale on Feb. 13, 2020. Please call with any questions or stop in anytime to check the bulls out. The coffee is always on!

Blaster is a high-capacity, deep-made, powerful bull. His Right Answer dam has great feet and legs with a tremendous udder. Genetically, he ranks in the top 1% of the breed for growth, docility and \$W. We love the depth and thickness on these Blaster calves. Our 2-year-old heifers we calved this past spring had their calves themselves and were very good mothers with really nice udders. Also easy to handle.

A good Payraise 4886 bull with some bred-in calving ease with 4886 and a SAV Pursuit mama. We used both of these bulls successfully on first calf heifers. Recommended for use on heifers.

This guy is long and deep-sided. He is out of an exceptional 112 daughter. He will give you modest birthweights at calving while adding length to your calves.
